# Portable Class Libraries & Shared libraries

# Dependency injection 101

A.cs

```
class A
{
    public void DoSomething()
    {
        // Resolve IA, and use it
        ServiceContainer.Resolve<IB>().DoSomething()
    }
}
```

PCLExample

B.cs

```
public class B : IB
{
    public void DoSomething()
    {
        // Do something Android specific
    }
}
```

PCLExample.Android

B.cs

```
public class B : IB
{
    public void DoSomething()
    {
        // Do something iOS specific
    }
}
```

PCLExample.iOS

# PCL Profiles – pick the one for you

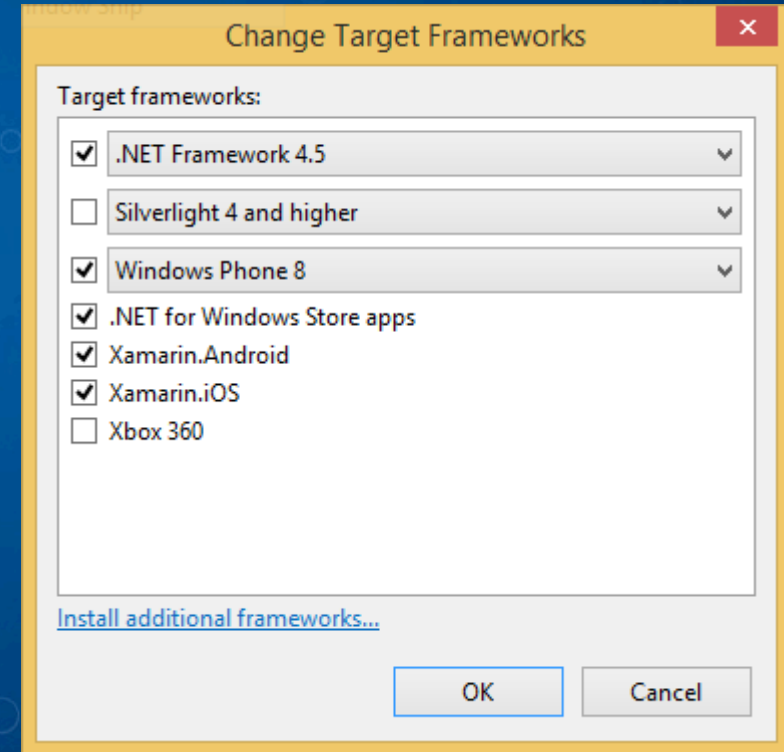

**Profile 78 (.NET 4.5, Windows 8.0, Windows Phone Silverlight 8.0)**

Async/Await

Works out of the box

Very good Xamarin compatibility

**This is Xamarin's current preferred profile, but that will likely change to 259 in the future**

Hands on
